WHAT IS CYBERLOGIX?

•*INFORMATION SHARING*

CYBERLOGIX is an Information Exchanging system that replaces the communications between suppliers/dealers/users that used to be done through Fax and E-mails. The old one-way communication could cause delays and miscommunications. By using CYBERLOGIX, suppliers/dealers/users can share all their information on our Website.

•*INFORMATION MANAGEMENT*

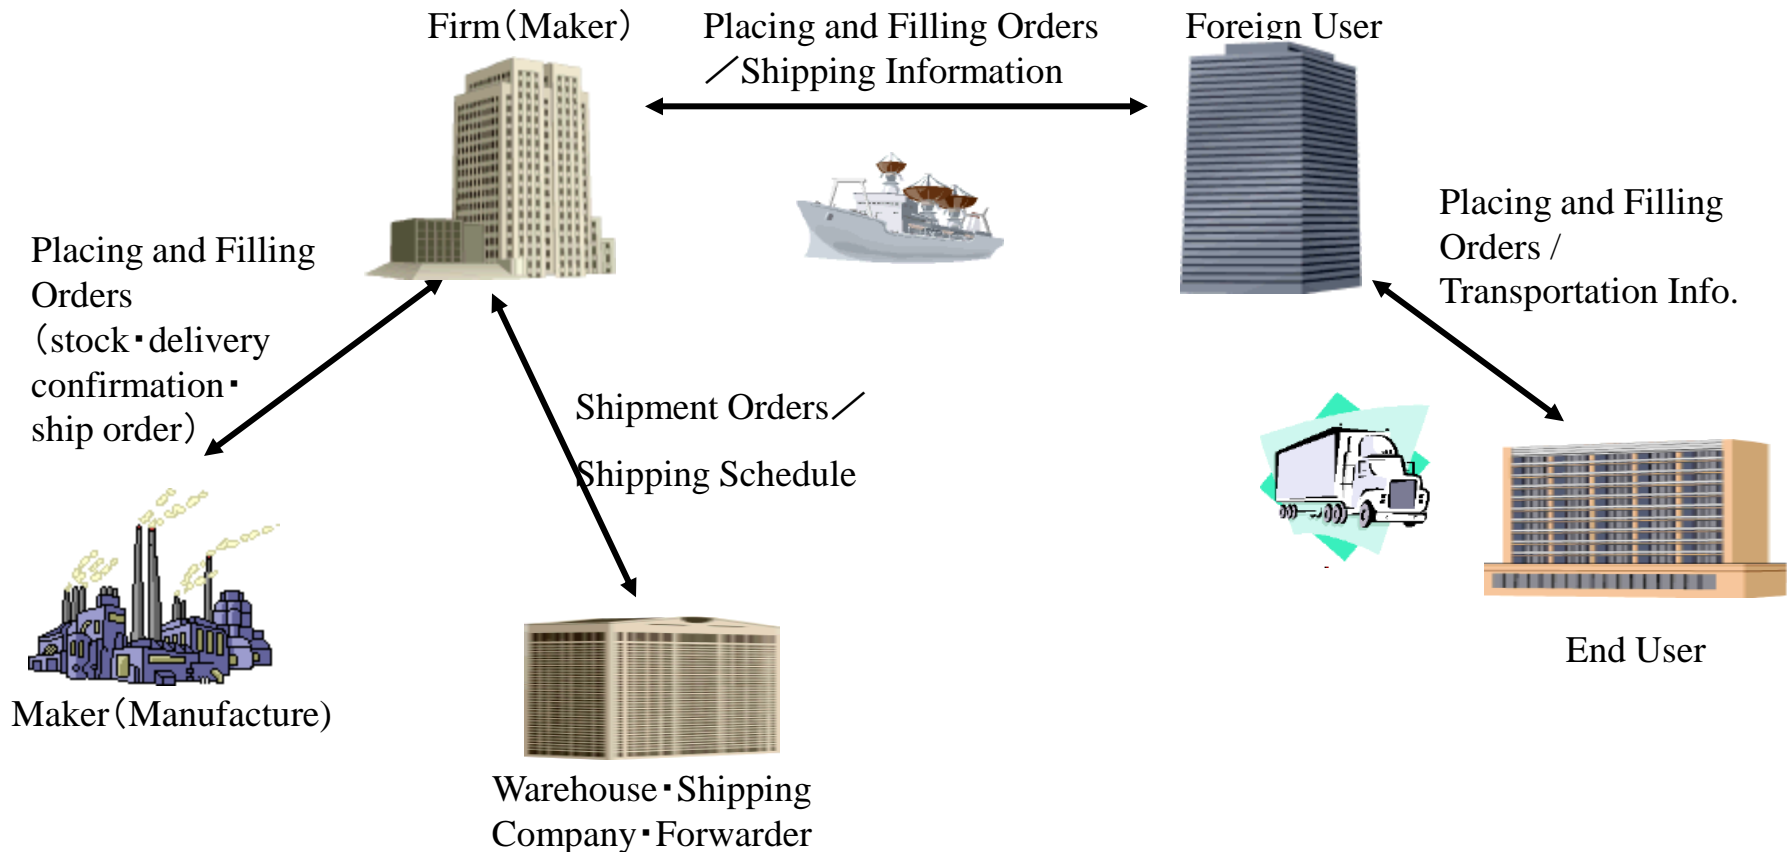

All information is updated on the web-site, allowing you to access it anytime, anywhere.

•*EASY ACCESS*

Since all operations can be carried out on the web site, no exclusive terminal or software is required. Anyone who has an admitted ID can access CYBERLOGIX and update the information.

Our goal is to improve your service levels to your Customers with efficient distribution plan by using CYBERLOGIX.

Information Exchange Without CYBERLOGIX

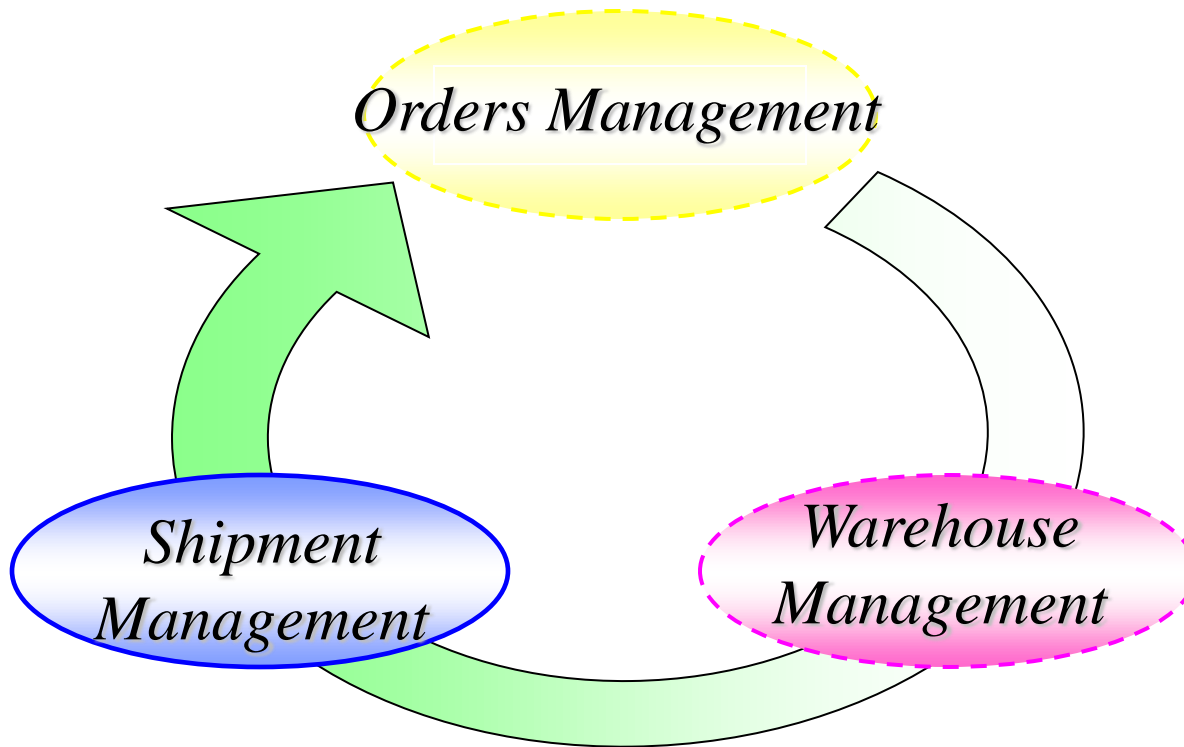

Information is not shared among participants, therefore there is a time lag and it is hard to keep current with updated information.

Information Exchange With CYBERLOGIX

Using CYBERLOGIX, all participants share information on the website and thereby improve customer service.

- **Orders Management**
 - Contract Management
 - Sales Records
- **Shipment Management**
 - Schedule Management
 - Partial/Consolidated Management
 - Shipping Records
- **Warehouse Management**
 - Stock Management
 - Turnover Management
 - Production Management
 - Stock Records
- **Other**
 - Mail function
 - FAX function
 - Book Making

Linking each module (shipments, orders, stocks) makes inputting information simpler for you. Moreover, we build the system according to your exacting requirements, therefore it's possible to customize your own modules.

• *Design Flexibility*

- Any contents/designs/applications can be easily constructed along with customer's various business demands. (eg. Not only logistics information but any sales reports and market information can be stored in a database on CYBERLOGIX.)

• *Mail Notice*

- All participants are receiving updated information by e-mail, every time it's updated.

• *Low Cost Operation*

- Since all operations can be carried out on the web-site, no exclusive software is required. Anyone who has an admitted ID can access CYBERLOGIX and update the information. Both initial costs and maintenance costs are offered at the best price.

• *Security*

- Limited Access by Firewall
- Data Base protected by ID and Password Certification on each page
